SUMMARY

Full-Stack developer and founder specializing in React/Next.js. Delivered 125+ domains, built a sales CRM, and shipped a monetized SaaS to 2,000+ active users.

EXPERIENCE

Union Technologies — Full-Stack Developer | 2023–2026

- Built a React/TS CRM that improved sales execution: pipeline stages, call scheduling, reminders, scripts, meeting invites, and lead-to-client handoff.
- Developed custom internal tools and automations (Node/Express) for data intake, validation, and admin workflows to reduce manual ops work.
- Delivered and maintained union/client web properties across 125+ domains, including member areas, custom forms, and reliable launches.
- Owned UI/UX and brand deliverables alongside development: social campaigns, print assets, event collateral, and merch-ready designs.

Down Syndrome Foundation — Web Developer | 2021–2023

- Shipped multi-month builds across ~12 nonprofit domains, delivering large page sets from UX prototypes to production.
- Launched program sites including Summer Camp registration and a Skills Development / workplace placement portal with complex forms and automated intake workflows.
- Implemented donation and intake flows plus admin-friendly content updates with accessibility-first UI.

OPHEA — JavaScript Developer | 2020–2021

- Built React and TypeScript internal tools and Node.js scripts to automate content updates used by 900+ Ontario schools.
- Helped maintain OPHEA's React codebase by fixing UI bugs, improving forms, and polishing admin workflows.
- Collaborated with non-technical staff to turn update requests into small React features and scripts.

PROJECTS

UnionTab — Founder / Full-Stack Developer

- Built and monetized a multi-tenant SaaS to 2,000+ active users (Next.js/React, TypeScript, Supabase/Postgres, Tailwind, Vercel).
- Implemented Stripe subscriptions, tenant-aware roles (admin/user), and core collaboration features (posts, files, meetings, public/private pages).
- Added account security controls and tiered access (free vs premium).

Help321 — Resource Finder (React)

- Built a React web app backed by a custom API to surface Down syndrome-related resources across Canada.
- Implemented fast filtering and query logic designed for easy navigation.

EDUCATION

OCAD University

(Toronto, ON) — Bachelor of Design (BDes), Digital Futures
(Sep 2018 – Apr 2022)

University of Helsinki

(Helsinki, Finland) — Full-Stack Open
(2023-2024)

CERTIFICATES

Google Project Management

Certificate (2025)

SKILLS

React & TypeScript
Next.js (App Router)
JavaScript & HTML/CSS
Tailwind CSS
Node.js & Express
REST APIs & GraphQL
Postgres/Supabase & MongoDB
Auth & RBAC (multi-tenant)
Stripe & SendGrid
Vercel & GitHub Actions
WordPress
(Elementor/WooCommerce)
Testing (Jest, React Testing Library)
