Full-stack developer and founder with 7 years of experience and a BDes in Digital Futures. Built and monetized a multi-tenant SaaS to 2,000+ active users, shipped a sales CRM and internal tooling, and launched 150 websites across 200+ managed domains. Comfortable owning a feature from database to UI, and the brand around it.

EXPERIENCE

UnionTab | Founder & Full-Stack Developer, Remote

2025 to Present

- Designed, built, and monetized a multi-tenant SaaS for union executives to 2,000+ active users (Next.js, TypeScript, Supabase/Postgres, Tailwind, Vercel).
- Implemented Stripe subscriptions, tenant-aware roles (admin/user), and tiered free vs. premium access.
- Shipped secure online voting, mass email and SMS, member portals, document storage, and event RSVPs.
- Designed a self-serve onboarding (no demo, no credit card on the free tier) to lower the barrier to sign-up; own brand, email funnel, infrastructure, and support.

Union Technologies (YOUNified platform) | Full-Stack Developer, Toronto (Remote)

2022 to 2026

- Built a custom React/TypeScript sales CRM: pipeline stages, automated follow-up scheduling, reminders, call scripts, and lead-to-client handoff.
- Automated the full lead lifecycle: rep assignment, auto-recontact of cold leads, and recurring client follow-ups.
- Built and maintained YOUNified, a multi-tenant membership app used by several thousand members.
- Launched 150 WordPress sites from brief to go-live; managed DNS, SSL, redirects, and launches across 200+ domains.
- Developed Node/Express internal tools for data intake, validation, and admin workflows, cutting manual ops work.

Canadian Network for Respiratory Care | Freelance Designer & Web Developer, Remote

2024 to Present

- Built a WordPress site and delivered a full redesign; provide ongoing web support, graphics, and short-form video.

Down Syndrome Foundation | Web Developer, Toronto

2021 to 2022

- Shipped ~12 nonprofit web properties from UX prototype to production, including camp registration and a workplace-placement portal.
- Built automated application and reply pipelines that sent applicants next steps on submission, cutting manual response work.

Ophea | JavaScript Developer, Toronto

2019 to 2021

- Built React/TypeScript internal tools and Node.js scripts that automated content updates for a platform used by 1,000 Ontario schools, roughly halving routine update time.

SELECTED PROJECTS

- UnionTab** (uniontab.com): Multi-tenant SaaS with voting, messaging, and member portals; 2,000+ users, Stripe, RBAC.
- ATU 1573** (atu1573.ca): Union site for 1,000+ members with 2FA login, member approval, and real-time notifications.
- Stingray Cleaning** (stingraycleaning.com): Next.js site with an instant-quote calculator that prices a job in under 60 seconds and captures the lead.

SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, accessibility, performance

Backend/Data: Node.js, Express, REST, GraphQL, Postgres/Supabase, MongoDB, Auth & RBAC, Stripe, SendGrid

Tooling: Git, GitHub Actions (CI/CD), Vercel, Jest, React Testing Library, WordPress, DNS/SSL

Design: Figma, UX prototyping, brand systems, Photoshop, Illustrator
